

Getting comfortable with using dB's

I published an article in the October 2026 publication of Practical Wireless Magazine.

Electronic viewing of the magazine, as part of a subscription, is here:
<https://pocketmags.com/eu/practical-wireless-magazine>

As necessitated by space constraints the graphics in the article might be a little small to be of any use for some readers.

So here are each of the graphics in high resolution.

Samuel

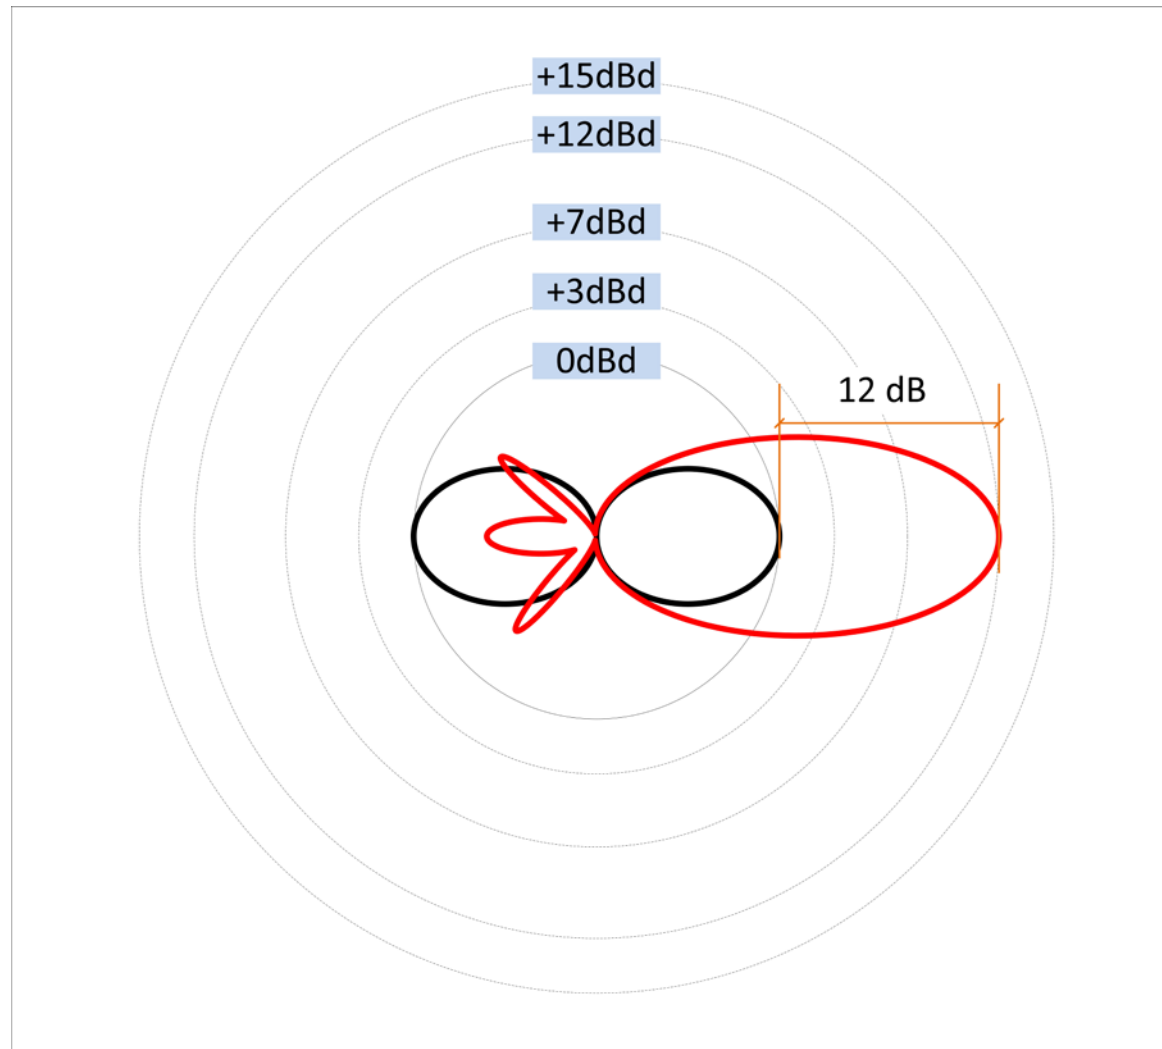

Figure 1. Comparison of antenna radiation patterns

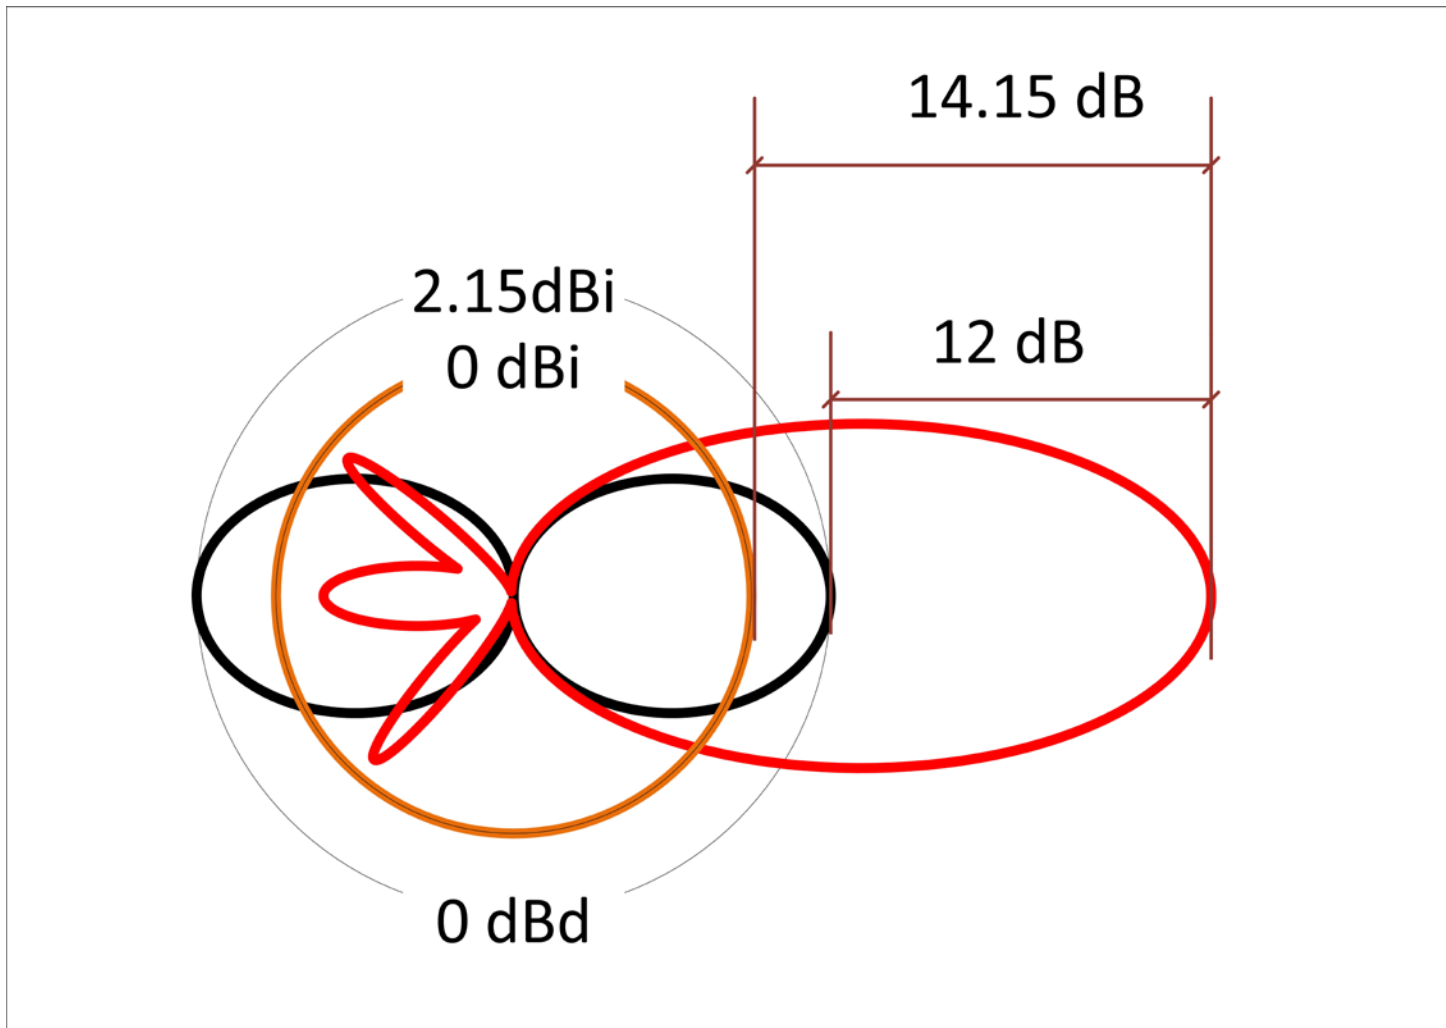

Figure 2. Adding dBi to our antenna comparisons

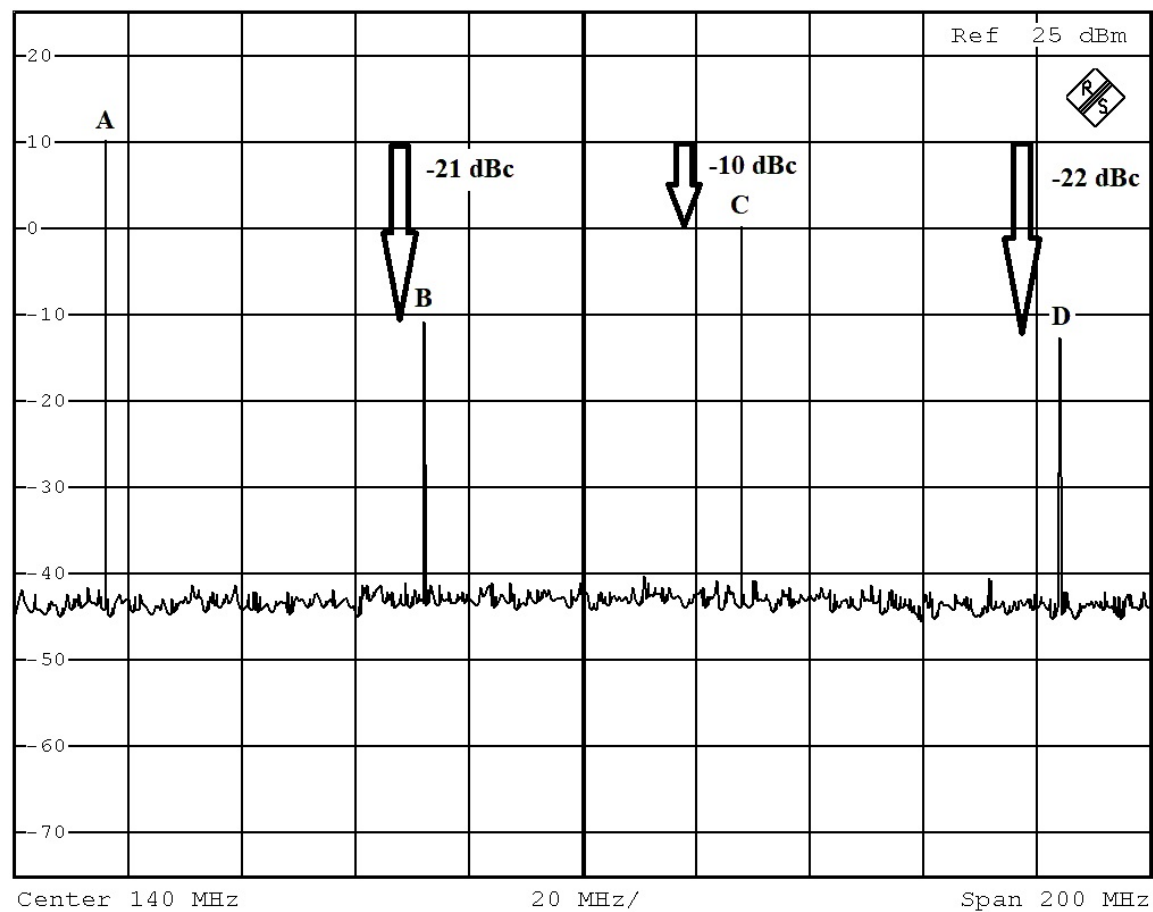

Figure 3. Screen capture from my spectrum analyser
